

LCD Phase Sequence Indicator(Contact Type)

CE

887 PR

The **887 PR** is a 3 Phases Presence and Rotation Indicator.

It does not need any battery as it derives its power from the system under test.

It can be utilized on a **3 Phases Powered System** without having to worry about damage to the tester or the system.

Once connected to a 3 phase power system, it indicates the phase presence by showing its corresponding LCD symbol.

It displays the rotation (clockwise or anti-clockwise) on the LCD.

This instrument represents the quickest and easiest way for verifying the presence and rotation of a 3 phase system.

You can, before connecting Supply to Load, and from the supply side; **Quickly and easily verify the presence of the three Phases on a 3 Phase Power System.**

Confirm the Phase Rotation on a Powered 3 Phase System.

3 Phase Presence Indication circuit:

This circuit uses the LCD to indicate if a phase is present.

These LCD indicators will light up when the voltage across any two phases are more than 40Vac.

3 Phase sequence Rotation indicator circuit:

This circuit has also a LCD indication This product does not require any battery as it takes its power from the circuit under test.
